PMRT - Perinatal Mortality Reviews Summary Report

This report has been generated following mortality reviews which were carried out using the national Perinatal Mortality Review Tool

The Shrewsbury and Telford Hospital NHS Trust

Report of perinatal mortality reviews completed for deaths which occurred in the period:

1/1/2024 to 31/3/2024

Summary of perinatal deaths*

Total perinatal* deaths reported to the MBRRACE-UK perinatal mortality surveillance in this period: *4*

Summary of reviews**

Stillbirths and late fetal losses

Number of stillbirths and late fetal losses reported	Not supported for Review	Reviews in progress	Reviews completed ***	Grading of care: number of stillbirths and late fetal losses with issues with care likely to have made a difference to the outcome for the baby
6	2	2	2	0

Neonatal and post-neonatal deaths

Number of neonatal and post-neonatal deaths reported	Not supported for Review	Reviews in progress	Reviews completed ***	Grading of care: number of neonatal and post-neonatal deaths with issues with care likely to have made a difference to the outcome for the baby
0	0	0	0	0

*Late fetal losses, stillbirths and neonatal deaths (does not include post-neonatal deaths which are not eligible for MBRRACE-UK surveillance) – these are the total deaths reported and may not be all deaths which occurred in the reporting period if notification to MBRRACE-UK is delayed. Deaths following termination of pregnancy are excluded.

** Post-neonatal deaths can also be reviewed using the PMRT

*** Reviews completed and have report published

Table 1: Summary information for the babies who died in this period and for whom a review of care has been completed – number of babies (N = 2)

*Neonatal deaths are defined as the death within the first 28 days of birth of a baby born alive at any gestational age; early neonatal deaths are those where death occurs when the baby is 1-7 days old and late neonatal death are those where the baby dies on days 8-28 after birth. Post-neonatal deaths are those deaths occurring from 28 days up to one year after birth

Table 6: Cause of death of the babies who died in this period and for whom a review of care has been completed – number of babies (N = 2)

Timing of death	Cause of death
Late fetal losses	**1 causes of death out of 1 reviews**
	The cause of death was undetermined
Stillbirths	**1 causes of death out of 1 reviews**
	The cause of death was undetermined
Neonatal deaths	**0 causes of death out of 0 reviews**
Post-neonatal deaths	**0 causes of death out of 0 reviews**

Table 7: Issues raised by the reviews identified as relevant to the deaths reviewed, by the number of deaths affected by each issue* and the actions planned

Issues raised which were identified as relevant to the deaths	Number of deaths	Actions planned

*Note - depending upon the circumstances in individual cases the same issue can be raised as relevant to the deaths reviewed and also not relevant to the deaths reviewed.

Table 8: Issues raised by the reviews which are of concern but not directly relevant to the deaths reviewed, by the number of deaths in which this issue was identified* and the actions planned

Issues raised which were identified as not relevant to the deaths	Number of deaths	Actions planned
This mother's progress in labour was not monitored on a partogram	1	Learning to be shared via PMRT learning slides.

*Note - depending upon the circumstances in individual cases the same issue can be raised as relevant to the deaths reviewed and also not relevant to the deaths reviewed.

Table 9: Top 5 contributory factors related to issues identified as relevant to the deaths reviewed, by the frequency of the contributory factor and the issues to which the contributory factors related

Issue Factor	Number of deaths	Issues raised for which these were the contributory factors
